HILL'S EVERGREENS

Home Trees Ever Beautiful

1923

Our Guarantee

We guarantee that all goods purchased from us will reach you safely and in good condition; be found true to name and prove entirely satisfactory, or we cheerfully refund money paid.

THE D. HILL NURSERY CO., Inc.

D. Hill Pres.

DUNDEE STATE BANK
DUNDEE, ILLINOIS
ESTABLISHED 1856

Elgin National Bank

CAPITAL \$ 100,000.00

EDWARD CONNIST PRESIDENT
WM. WILCOX, VICE PRESIDENT

E. F. O'HARA CASHIER
C. A. DAVID, ASS'T CASHIER

ELGIN, ILL.

TO WHOM IT MAY CONCERN:

I am glad to recommend the D. Hill Nursery Company Inc. to anyone desiring to purchase evergreens etc. I have known Mr. David Hill for over thirty years, and his sons all their lives, and all have the highest reputation of square dealing.

By careful attention to the quality of their stock, they have gradually built up an immense big business, and are shipping stock to all parts of the world.

F. W. Pease President.

TO WHOM IT MAY CONCERN:

D. Hill, and successor, The D. Hill Nursery Co. Inc., of Dundee, Ills., have for many years been valued depositors and customers of this Bank.

They have at Dundee one of the largest evergreen nurseries in the world and the high quality of their goods has brought them a very large business.

They have the highest reputation for honesty and fair dealing and we cheerfully recommend them to anyone desiring goods in their line.

THE ELGIN NATIONAL BANK,

H. O'Brien
Cashier.

What Others Say

Your Evergreens are of very excellent grade and all doing well. Will need more next year.

M. W. MIX,
Mishawaka, Ind.

I want to take this opportunity of complimenting you on the very splendid manner in which the Evergreens were burlapped and placed in car. Out of the entire number of very nearly 500 trees only one was damaged.

GUSTAVE PABST,
Milwaukee, Wis.

Evergreens just received. The packing and care you take is worth a good deal to those who want the best in nursery goods.

LOUIS D. TRUDEAU,
Woburn, Mass.

The five cars of Evergreens for Mr. Henry Ford, Dearborn, Michigan, arrived in first class condition. Allow us to thank you for the efficiency and speed which you gave this order, also for the careful balling. The writer does not recall having seen a single tree in the entire five carloads that was damaged by careless handling.

H. W. WOLCOTT,
Landscape Architect,
Jackson, Mich.

All the trees which we bought from your nursery have done exceedingly well. Be assured that when we need anything for the golf course I shall consult you.

CHAIRMAN, GROUNDS COMMITTEE,
Calumet Country Club,
Chicago, Ill.

A Personal Greeting

To Old Friends and New:

Each year I realize more and more that any catalog can give no more than a *suggestion* of the grandeur of Evergreens, as I have learned to know them through the association of a lifetime.

When you know Evergreens, you feel in their presence the hush of the vast forest—you see the silent sentinels, Evergreens, typifying permanency—defying time and the elements.

The Evergreen is something nature has given man to typify eternal promise—the promise that Spring shall always come again. In snowy winter, it gives the only note of comforting color in the bleak landscape. In summer it adds serenity to the riot of colors that the smiling sun coaxes forth from nature. An Evergreen is like an old friend—the stress of years—the strife of a lifetime only make richer his noble character. So is a home surrounded by Evergreens like a man with many true friends. As the poet says:

"A toss of my cap to the Cedars!
The lovingest trees that be,
The time tides roll and the seasons veer,
Yet tender, sweeter, year by year,
My Cedars are true to me."

In the storehouse of nature are many things beyond your power to possess, but any lover of nature can surround his home with Evergreens. In their manner is grace—in their color is rest—in their presence is inspiration—their influence is perpetual. An Evergreen is truly a tree with a great and noble character.

D. Hill

Hill's Evergreens

In Order to provide Specimen Evergreens in uniform quality that come up to the Hill standard, a process of careful individual selection is rigidly followed. When Hill Evergreens are four or five years old, we go through our immense blocks and select out the very best trees of uniform color, symmetry and habit of growth to transplant and grow into individual specimens. Out of our blocks of thousands, only a few hundred Evergreens are selected that come up to our *specimen standards*. This accounts for the perfection of each individual Hill Specimen Evergreen.

Cultivating

Transplanting and Root-Pruning

Frequent transplanting and root-pruning gives Hill Specimen Evergreens masses of fine, fibrous feeding roots. This, together with annual shearing, results in heavy, bushy, symmetrical tops.

Balled and Burlapped and Hand Dug

Every Hill Specimen Evergreen is carefully hand dug, leaving a large earth ball about the roots, which is securely burlapped. Our soil contains just enough clay so that earth ball remains intact. This method of digging leaves the roots undisturbed in a ball of rich nursery soil, and insures the success of Hill Specimen Evergreens in the hands of the planter. As additional protection, each earth ball is securely burlapped.

Careful Packing

Seeing that your Evergreens are carefully packed is of equal importance. Our over sixty-five years' expert knowledge in properly packing Evergreens for long distance shipments is your guarantee of safe arrival.

Landscape Service

Should you desire the service of a competent Landscape Architect to assist you in the proper arrangement of your trees, we will gladly put you in touch with some one in your immediate locality. We are in direct communication with all the leading Landscape Architects and can easily refer you to some one best qualified to handle your problems.

Packing

A bird's-eye view of the Hill Nursery

Hill's Evergreens
Balled and Burlapped

Specimen Evergreens in nursery row.

Colorado Douglas Fir (*Abies Douglasii*). At home in almost any situation. A beautiful, rapid grower.

Colorado Douglas Fir

(*Abies Douglassi*)

Douglas Fir is an upright, symmetrical branched tree, reaching 60 feet or more in height; branches spreading 12 to 18 feet in old trees. Grows rapidly and thrives well in almost any situation. A tree that is widely known and appreciated in both Europe and America.

Our plants are the type from Northern Colorado, the seed being collected in deep gorges of high altitudes, where the blue and silvery foliage is characteristic, being compact and symmetrical in growth, with rather short needles, in contrast to Southern Colorado and New Mexico type which are of doubtful hardiness, irregular and open growing. By personally supervising the collection of seed we grow only the genuine Colorado type.

Douglas Fir was introduced by David Douglas, the eminent Scotch explorer, in 1827. It was shortly after named for him to commemorate his memory.

Concolor Fir

(*Abies Concolor*)

Queen of the Firs

More than 30 years ago, Mr. D. Hill, while on a visit to the Colorado Rockies, was keenly impressed with the distinctive attractiveness of the Concolor Fir. Chiefly through his efforts this beautiful Fir has been introduced to American planters. Concolor Fir is also known as Silver Fir and White Fir.

We are careful to obtain our seed supply from Northern Colorado, producing trees of absolute hardiness with striking foliage varying in color from light green to deep soft blue with medium short needles. The new growth in Spring is of silvery whiteness, very beautiful. Long-lived, growing 60 to 80 feet high, thriving well under all conditions.

A well known Evergreen authority writes, "Concolor Fir is the showiest of all Firs, because it is the nearest to blue. In my opinion it is the cheeriest of all Evergreens in winter. It retains its lower branches, has no insect enemies, and is the best Fir tree to withstand heat and drought."

The strain of Concolor Fir from New Mexico, where seed is cheap and always abundant, is much inferior, inclined to winter kill, and is of rather straggly, open appearance. Our trees are guaranteed the true Colorado type, excellent in form and color.

Balsam Fir

(*Abies Balsamea*)

Most Fragrant of All Evergreens

The characteristic odor of the northern woods is chiefly if not solely due to this Fir. The foliage is very fragrant, young growths often being used for making the favorite "Balsam Pillows." Makes a handsome lawn specimen, rarely growing over 30 to 40 feet high.

While Balsam Fir is very fragrant, and will always be in demand, it is not so long lived or as generally satisfactory as the other Firs.

Native to the North Central and North Eastern States, extending through the most of Canada. Thrives best where there is an abundance of water at the roots.

Price, Extra Selected Specimens, B&B

Balsam Fir Brings the odor of the woods
to your door.

Hemlock (*Abies Tsuga Canadensis*). Winter's winds and snows hold no terrors for our Northern Hemlock.
We propagate only the hardy northern strain.

Hemlock

Abies Tsuga Canadensis)

A Graceful Native Conifer

The family of Hemlocks is quite limited. The *Tsuga Canadensis* offered here is the most reliable and satisfactory variety for northern and eastern states.

In the past many Hemlocks in American nurseries were imported from Europe, where they were propagated from seed collected in America in the southern states, Carolinas, Tennessee, etc. When these trees were shipped to America to colder climates they produced rather inferior types of trees which often winter scalded, turned a ragged brown or killed outright. The value of our strain of Hemlock is based on seed selection from northern sources only, insuring trees of hardiness and free, graceful, upright growth.

The natural habit is very tall, 50 to 60 feet, much less in cultivation. By careful shearing of the branchlets in the nursery we produce trees of distinct merit, compact and symmetrical in growth. The foliage of Hemlock is the most graceful and delicate of all large trees. Does well in moist soil, partially protected from cutting winds.

5 of same variety and size at 10 rate. Each x indicates one transplanting.

B&B signifies balled and burlapped.

The Hemlock makes beautiful hedges, on account of its density of growth and ease of shearing.
For other hedge Evergreens see page 59.

Only Evergreen trees can add such charm and dignity to your home. These magnificent specimens are Concolor Fir (*Abies Concolor*). See page 7.

Hill's Silver Juniper

(*Juniperus Scopulorum*)

A Remarkable New Introductoin

BY D. HILL

The beautiful silvery blue color alone is sufficient to make anyone want to plant Hill's Silver Juniper, but the exquisite color (which it keeps at all seasons) is only one of its many interesting features.

Hill's Silver Juniper is narrow, compact, and symmetrical. It has one single stem, in contrast to some varieties of Junipers with several stems. This makes it safe from heavy snows and wind. The inner foliage does not turn brown, as in the Irish and Swedish Junipers, but remains a good, healthy color throughout the tree.

In the Fall months the berries darker, and silver colored. The abundantly and make a great at-

Hill's Silver Juniper can be landscaping. In foundation vidualy, it can be planted with also makes it desirable in for-

Red Cedar (*Juniperus Virginiana*). Very hardy. Dark green to bluish foliage.

ODE TO THE CEDARS

Oh, here's a glee to the cedars,
Our stanch old friends and true!
What boots the snow, when wild winds
blow;
For never a change do the cedars know
All the long years through.

Red Cedar

(*Juniperus Virginiana*)

The Dean of All Junipers

Extra narrow pyramidal habit, dark green to bluish foliage. It is one of the most useful and characteristic trees of our American landscapes, rivaling the Italian Cypress in beauty. Adapted for planting in all sections of the country.

In its natural range Red Cedar grows from Alaska down to Florida. It varies in habit from a low shrub to a tall, narrow pyramid. Some strains are loose, open growers, not at all adapted for landscape work. After thorough trial of several types, we have discarded all but the Platte River type, gathering our own seed from the most desirable trees. The propagation of this valuable Conifer has been a specialty with us for many years. It is interesting to note that from this tree various varieties of Junipers are propagated by grafting, including *Juniperus Glauca*, *Counarti*, *Schotti*, and *Elegantissima Lee*, mentioned in the following pages.

The foliage and wood emit that pleasing, spicy, fragrant cedrus odor. In season the tree is covered with bright blue and silver berries. Red Cedar can also be trimmed into any shape, excellent for hedges and topiary work. (See page 55.) On account of being easily trimmed, Red Cedar can be used in almost any situation, either alone or with other varieties.

Juniper Glauca (*Juniperus Glauca*). Upright—symmetrical, fine blue color.

Juniper Glauca

(Juniperus Glauca)

Choice Pyramid. Soft Blue Color

In this variety, the whole of young growths are of almost silvery whiteness, which changes to beautiful bluish green in winter. It never grows very large, not over 15 to 20 feet, and it can be kept even smaller if desired.

The Juniper Glauca is foremost among the interesting group of Junipers that have been developed from the Juniperus Virginiana (Red Cedar). We constantly strive to improve our strain by careful selection, and reproduce only the best types, most true to form, color, compactness and habits of growth. In grafting this tree, we are careful to use for understocks only the dependable Red Cedar, insuring hardiness and longevity.

Juniperus Pyramidalis Narrow—Spire-Like

A variety of distinct merit noticed by A. H. Hill on a visit to the Johannes Von Ehren nurseries, near Berlin, Germany, in 1908. Introduced into the United States the following spring when we imported all the available stock, 100 trees, 3 feet, which forms the basis of our propagating stock. It is absolutely hardy and a good grower, being narrow, very pyramidal, with good, dark green foliage.

Juniper Schotti

(Juniperus Schotti)

Its general appearance is like Juniperus Counarti, shown on page 17. It is distinguished, however, by its bright, rather yellowish-green foliage. Very hardy. Growing 15 to 20 feet and stands almost any amount of trimming. We have an excellent stock of choice trees of unusually fine form and color.

The origin of this tree is not definitely established, although it is thought to have originated in one of the European nurseries some years ago.

Price, Extra Selected Specimens, B&B	Each	10

"Welcome and Goodbye." You are setting the stage for much of life's drama when you select an entrance for your home. You cannot give too great consideration to its quality and design. We will duplicate this planting for \$45.00. Ask for Suburban Collection.

Lee's Golden Juniper

(*Juniperus Elegantissima Lee*)

Here is a tree that will give variation to the green and blue colors of other Evergreens. You would not want an entire planting of them, but a single tree here and there is very pleasing.

It is rather broad and bushy with slightly drooping, rich, creamy golden foliage. Unless kept low by trimming, it will grow 10 to 15 feet feet high. It has the characteristic Juniper foliage, soft and lacy, easily trimmed. It is beautiful in combination with almost any other variety. Likes a fairly sunny location. Ours is an improved strain of exquisite color and growth. Very hardy.

Price, Extra Selected Specimens, B&B

	Each	10
2 to 3 feet xxx.....	B&B \$ 7.00	\$67.50
3 to 4 feet xxx.....	B&B 9.50	90.00

Lee's Golden Juniper.

Juniper Counarti

(*Juniperus Counarti*)

Handsome, Dark Green

This is a pyramidal, compact grower of medium size, reaching 15 to 20 feet. With only a few moments trimming each Spring, it can be kept at any size wanted. It has rich green, heavy tufted foliage. Occasionally some trees bear a heavy crop of blue and silver colored berries, which adhere late in the autumn and are greatly enjoyed by some birds.

This is a choice and rare variety grown by grafting, a process to which we have given special attention. The original trees were introduced from Europe some years ago and stocks are still quite scarce. This is one of the best trees for house foundation groups.

Price, Extra Selected Specimens, Balled and Burlapped

	Each	10
3 to 4 feet xxx.....	B&B \$ 7.50	\$ 70.00

The Colorado Blue Spruce, with its exquisite, steel-blue splendor, is well placed just at the corner, not too near the house. The fresh, verdant Woodward's Globe Arbor Vitae help to give fullness in the corner.

Juniper Counarti—This specimen is 4 to 5 feet. An average tree photographed in our nursery.

Juniperus Canadensis

Sometimes catalogued as Juniperus Communis which is erroneous. The name Juniperus Communis Depressa is also applied, which is a synonym.

Excellent Ground Cover

The well known, valuable, many-stemmed Dwarf Juniper. Rarely exceeds two feet in height. It is at home on sandy or gravelly hillsides fully exposed to the sun, where single plants often reach 15 feet or more in diameter, but can easily be trimmed to any size wanted. As a border to walks, as an edging to tall trees, or for a ground cover, it is always splendid. It is a rapid growing, vigorous and extremely hardy tree.

Grows native in various sections of the country, but we obtain our seed from Northern Wisconsin, which is the superior type. Foliage is a gray green, light silvery green beneath.

Price, Extra Selected Specimens, Balled and Burlapped

		Each	10
Green, 1 to 1½ feet xx.....	B&B	\$ 1.75	\$ 15.00

Juniperus Canadensis—we grow both the green and golden type.

Japanese Trailing Juniper

(*Juniperus Chinensis Procumbens*)

The following description is taken from a bulletin of the Arnold Arboretum, Harvard University: "This is the best known of the prostrate Junipers which Japan has sent to the gardens of the west. It is a plant with wide-spreading procumbent stems, blue-green, sharply pointed leaves marked on the upper surface by two white lines. It is perfectly hardy."

Reaches from 10 to 15 feet in diameter, but can be kept smaller by trimming. It never grows over 8 to 12 inches high, but makes a rapid growth of long branches that cling tight to the ground. It can be used in almost any planting. For beds, for low borders, terraces, hillsides, and rock gardens. It thrives even under adverse conditions.

There is considerable variance among varieties offered as *Procumbens*, but we are careful to propagate only from the true strain consisting of hardy, compact growing plants from trees we imported direct from Japan.

Price, Extra Selected Specimens, Balled and Burlapped	Each	10
1½ to 2 feet xxx.....	B&B	\$ 5.75 \$ 55.00

Juniperus Sabina Horizontalis Trailing or Creeping Form

This most interesting new creeping form we secured a few years ago from Russia. It has that rugged constitution of all trees that have struggled against the bleak Siberian winters.

It has not been affected in the least by the coldest winters during the past eight years since we secured it. While all specimens are more or less low and creeping in habit, there are at least a half dozen different distinct types among them. You will find it one of the most interesting little trees and you will take great pleasure in watching it develop. The color of foliage also varies, including different shades of green and blue.

Price, Extra Selected Specimens, Balled and Burlapped	Each	10
1 to 1½ feet xxx.....	B&B	\$ 3.00 \$ 27.50

Juniperus Canadensis is at home on sandy or gravelly hillsides where single plants often reach 15 feet or more in diameter.

Hill's Waukegan Juniper

(*Juniperus Sabina Prostrata*)

Most Striking of All Creeping Junipers

Foliage Silvery Blue

This interesting new creeping Juniper has a number of distinctive features which make it by all means the most desirable introduction in creepers in recent years. The growth is very low and compact, making a dense mat, in contrast to the open growth of some varieties.

The exquisite color first attracts attention. It is soft blue in Spring and Summer, changing to a rich purple color in late Fall. The contrast of colors at different seasons gives it a distinction not found in other varieties. A few of these little trees give new life and interest to a planting of darker green varieties of Evergreens.

It is not particular as to soil conditions. It grows equally well in rich garden soil or on rocky slopes, terraces, etc. It is unsurpassed as a ground cover where grass will not grow, for rock gardens, Japanese gardens or as edging to Evergreen borders. It grows close to the ground, not over six to eight inches high, but spreads out a dozen feet or more, depending upon soil and planting conditions.

Those who are seeking the newest and most interesting introductions in Evergreens will be delighted with this new Juniper. We are propagating it extensively, but now have only the smaller plants (not balled and burlapped). To anyone who wishes to secure a few plants for trial, we will gladly send small trees 8 to 10 inches, once transplanted, guaranteed the genuine blue type, at \$1.00 each. Just as soon as possible we will have this tree in good quantity in sizeable plants.

Hill's New Introductions

Descriptions and prices of trees shown in this group will be found elsewhere in the catalog.

Pfitzer's Juniper

(*Juniperus Pfitzeriana*)

"The handsomest of the Chinese Juniper varieties, the Pfitzeriana, which grows in the form of a low broad pyramid, is the most satisfactory of all Junipers in this climate. Fortunately it can now be found in American Nurseries." ARNOLD ARBORETUM.

It was originated some years ago in Pfitzer's Nursery, near Berlin, Germany. Introduced by Ludwig Spaeth, famous German Nurseryman into general cultivation, from whom we obtained our original plants for propagating. A wide, plumose and graceful Evergreen of healthy blue-green foliage. Branches grow horizontal from the stem, forming a flat, spreading top. Height 6 to 10 feet. Specimens also shown on page 47.

Price, Extra Selected Specimens, Balled and Burlapped

		Each	10

Pfitzer's Juniper (*Juniperus Pfitzeriana*).

In plantings of this kind such trees as Junipers, Dwarf Pine, Yews and Arbor Vitae are appropriate. The taller trees for background are Douglas Fir Blue Spruce Austrian and White Pine.

Juniperus Sabina Tamariscifolia

An excellent creeping dwarf variety. The foliage is fine in texture; average height is one foot, with a spread of 6 to 8 feet when full grown. Sometimes called Gray Carpet Juniper and the name Tamarisk Leaved Juniper is also applied to it. It is said to occur wild in Sicily, Greece and other places. Our stock is propagated from true stock from the Kew Gardens in England.

A very vigorous grower, forming a compact and perfect mat of bluish or gray-green. Grows very dense and never changes in color.

Price, Extra Selected Specimens, Balled and Burlapped

		Each	10
1½ to 2 feet xxx.....	B&B	\$ 7.00	\$ 67.50

Juniperus Virginiana Globosa

It is perfectly round—very dense in growth—its many short branchlets covered with soft foliage of light green, dark green and gold. Excellent for planting among perennials, in rock gardens, Japanese gardens and in situations requiring Evergreens that will remain small. The trees we offer were imported direct from Japan and have been growing in our nursery several years.

Price, Extra Selected Specimens, Balled and Burlapped

B&B Signifies Balled and Burlapped.

Specimen of Juniperus Tamariscifolia. American Yew (*Taxus Canadensis*) in background.

The corners of the house have been given just enough attention. The lovely American Arbor Vitae at the left with the trim little Woodward's Globe Arbor Vitae near it pleasantly softens the hard straight lines and rounds off the corners gracefully. Flanking the entrance on each side is a beautiful specimen of Hill's Pyramidal Arbor Vitae and a pair of most picturesque and interesting Dwarf Japanese Yew.

The four Hill's Pyramidal Arbor Vitas are the taller trees in back. On each extreme end is a beautiful blue Juniper Glauca. Next to these come the prim Red Cedars. They are purple-bronze color in winter, changing to bright green in Spring. The interesting rare Lee's Golden Juniper is in the center with a Hill's Dwarf Mountain Pine on each side. Your own home—why not make it as charming as this one? You can do it easily.

The correct arrangement—tall growers in back—low growers in front. You will find page 54 of interest in selecting the right varieties according to size at maturity.

Savin Juniper

(*Juniperus Sabina*)

An ideal tree for foundation groups, or low borders. Easily trimmed and kept within bounds. Color is a dark green. Height 5 to 8 feet or less, having numerous semi-erect spreading branches. Prefers dry, rocky, sunny slopes. Very hardy, growing from 4,000 to 10,000 feet above sea level. The Savin Juniper was introduced into British gardens at a very early date, as it is mentioned in Turner's "Names of Herbes," published in 1548. Native of Central and Southern Europe.

Price, Extra Selected Specimens, Balled and Burlapped

		Each	10
1 to 1½ feet xx.....	B&B	\$ 2.50	\$ 22.50

5 of same variety and size at 10 rate. Each x indicates one transplanting. B&B signifies Balled and Burlapped.
Not as heavy as xxx stock, but fine strong plants.

Savin Juniper (*Juniperus Sabina*).

You can duplicate this planting with Dwarf Mountain Pine, Juniper Glauca, American Arbor Vitae and Woodwards Globe Arbor Vitae at a cost of only \$50 to \$75.
Think of what this planting would mean around your home.

American White Spruce

(*Picea Alba*)

Described by Bailey, the eminent horticulturist, as: "A native of the northern parts of America and justly thought to be one of our best Evergreens. A compact and upright grower of great longevity. Trees over fifty years old remain well branched at bottom, retain their pyramidal form and annually make an upward growth. It will grow on a great variety of soils, bear crowding well and also stand severe trimming. Being a native of cold climates it grows most successfully when planted north of a line from Philadelphia to St. Louis." Foliage is light green with slightly bluish tinge.

White Spruce is especially suitable for tall backgrounds, shelters, windbreaks and tall screens. When it is desired to develop single specimens, they should be allowed 12 to 15 feet for full spread of the branches. It is fairly rapid in growth.

The best type prevails throughout Northern Wisconsin, from where our seed is gathered from carefully selected grounds.

White Spruce (*Picea Alba*).

Here is a suggestion that can well be copied for parkway plantings. Austrian Pine surrounded by Dwarf Mountain Pine and Savin Junipers were used in this instance.

Colorado Blue Spruce

(*Picea Pungens Glauca*)

Glistening, Silvery Blue in Color

Other trees there are of almost every imaginable form and color, but here is truly the culmination of nature's highest effort to produce the beautiful. Picture in your mind a perfectly shaped tree with an abundance of heavy foliage of a rich glistening blue, which flashes and sparkles in the sunlight, and you can form only a faint idea of the magnificent beauty of this truly marvelous tree.

The glory of the Blue Spruce is in its foliage, which is an intense steel-blue. It has created a sensation throughout the United States and Europe and is indeed a triumph in Evergreen growing.

Hill's Colorado Blue Spruce are selected specimens grown from seed collected from the very bluest of the native Colorado Blue Spruce. The Grafted Blue Spruce are from our extra fine strain of rich blue color.

For a great many years we have been headquarters for Blue Spruce and always maintain a large and interesting stock.

"Colorado Blue Spruce has a regal grace, stern and unyielding in outline, like an oak among the Conifers. There is probably no state in the Union where it will not thrive. Hardy, healthy and wonderfully beautiful it should be welcomed to every home."—C. S. Harrison.

Colorado Blue Spruce

Koster's Blue Spruce

Grafted Type

Truly nature's highest effort to produce the beautiful is embodied in these glistening Blue Spruces.

The stress of winter only adds to the beauty of the home surrounded by Evergreens.

Black Hill Spruce

(*Picea Canadensis*)

In describing to our patrons the different varieties of Spruces, we wish to call particular attention to the Black Hill Spruce. The very smallest trees of this variety soon form round, sturdy, compact bodies. As the tree grows and develops it adds to this particular style of growth and in most cases is found to be the most compact growing Evergreen belonging to the Spruce family. It retains its branches close to the ground even in old trees.

Somewhat similar (and closely related) to White Spruce. Very symmetrical, compact and bushy. Hardest of all Spruces. A native of the Black Hills of South Dakota. First introduced into commercial culture by Mr. D. Hill many years ago. Found entirely satisfactory north of a line from St. Louis to Philadelphia. Foliage varies from green to bluish tint.

		Each	10
2 to 3 feet xxx.....	B&B	\$ 5.00	\$ 47.50

Hill's Norway Spruce

(*Picea Excelsa*)

The merits of Norway Spruce have been known and appreciated for many years. It grows rapidly and thrifly and is always heavily clothed with masses of deep green foliage.

Some of the finest old hedges are Norway Spruce. It trims easily. On farms and around homes all over the country Norway Spruce windbreaks will be found.

As the Norway Spruce prevails over a wide range of territory in Europe, there are naturally many sources from which to obtain seed. Our careful experiments and close study of this situation for many years has proven conclusively that seed from high elevations in the Swiss Alps insures a really superior type of Norway Spruce exactly suited to U.S.A. conditions. We use this seed exclusively.

Norway Spruce—The time honored Christmas Tree.

Black Hill Spruce (*Picea Canadensis*). Makes the closest, compact growth of any spruce.
Very hardy, even in extreme north.

Austrian Pine (*Pinus Austriaca*.)

Austrian Pine

(*Pinus Austriaca*)

It is sometimes called Black Pine. Has a broad spread of long branches with long stiff dark, glossy green needles. Stems of branches are very dark colored. It does well under unfavorable conditions, such as heavy cold winds, dry hillsides, or poor soil. A fast growing tree that reaches a large size under favorable conditions.

Mr. C. S. Harrison, eminent Evergreen Authority, says: "The Austrian Pine is a compact, symmetrical and sturdy tree. I see one from my window which was planted in poor soil twenty-five years ago. It is a beautiful pyramid about thirty feet tall. The lower branches touch the ground."

		Each	10
2 to 3 feet xxx.....	B&B	\$3.00	\$27.50
3 to 4 feet xxx.....	B&B	5.00	45.00

RED PINE

(*Pinus Resinosa*)

Also known as Norway Pine. Native of the northern part of the United States, reaching its greatest development in northern Wisconsin. One of the most ornamental trees for the north. Needles are long and soft, a good green color, not so dark as Austrian Pine.

Grows 40 to 50 feet, spreading 10 to 12 feet. On older trees, the bark is reddish brown which gives the tree the name Red Pine. It is a large tree suited for locations with plenty of room, for backgrounds, for screens or windbreaks. It makes a magnificent tree, is very long lived and extremely hardy.

Attract the Song Birds

It has been observed that birds will travel for miles to make their home in the shelter of Evergreens, which form a substantial shelter and nesting place, especially for those birds who stay for the winter months. Among Evergreens there are several varieties the fruits of which make excellent food for birds. American Yew, Japanese Yew, Red Cedar, Juniper Glauca, Juniper Counarti and Hill's Silver Juniper are well supplied with berries.

An added charm of Evergreens is revealed in their widely contrasting growing habits. Red Cedar (Page 13) and Pyramidal Arbor Vitae (page 49) are the prominent trees in this planting.

Swiss Stone Pine (*Pinus Cembra*)

Swiss Stone Pine

(*Pinus Cembra*)

One of the most interesting of Pines producing edible seeds or nuts. Its growth is slow, rarely exceeding one foot each season. It requires but little room and is always well furnished with foliage. Formerly grew over a wide area of both Europe and Asia. It was first cultivated in 1746.

On account of its slow growth it is one of the few Pines that can be planted in close quarters. As it develops, it grows into a spire-like tree, maintaining much the same shape and appearance in old age as in the smaller tree shown in picture.

1 to 1½ feet xxx.....	B&B \$3.50	\$32.50
1½ to 2 feet xxx.....	B&B 4.00	37.50

Ponderosa Pine

(*Pinus Ponderosa*)

Sometimes called Bull Pine (on account of the heavy, massive needles) or Western Yellow Pine. The most widely distributed Evergreen of North America. The type found growing in the Black Hills of South Dakota, from where we obtain our seed, is a much superior type, being a hardy, free upright grower.

Very deep rooted and drought resistant. It is a handsome, ornamental tree, with interesting long needles of good green color, bluish-white underneath.

Price, Extra Selected Specimens, B&B.

	Each	10
2 to 3 feet xxx.....	B&B \$3.00	\$27.50
3 to 4 feet xxx.....	B&B 4.75	42.50

Limber or Flexilis Pine

(*Pinus Flexilis*)

A stocky tree of medium size with stout horizontal branches, forming a narrow pyramid. The foliage is bluish white beneath. On older trees the bark is creamy white, corky and porous. Fine for rocky slopes. Also called Limber Pine. Discovered in 1820 by Dr. James, who accompanied Long's Expedition to the Rocky Mountains in 1820-21. A very uncommon tree that you will find extremely interesting. The branches are very flexible which accounts for its name.

K&S

Limited space is no bar to the possibilities of Evergreens: even a city lot offers opportunities for beautiful surroundings.

Rest, quietness and peace seem to radiate from this home. The sharp lines and angles of the entrance are softened and made pleasing. The noble, dignified Pyramidal Arbor Vitae are correctly used. Staunch American Arbor Vitae, favorite Hemlocks and the tidy Red Cedars are a combination that looks well almost anywhere. Here they give a well rounded look to the corner. The plump little Hill's Mountain Pines set in front seem to blend the house and lawn together most gracefully.

Masses of low, bushy Evergreens are easily produced with Dwarf Mountain Pine as shown in this planting.

The compact regular growing characteristics of Hill's Dwarf Mountain Pine are clearly shown in this picture taken on our grounds.

Hill's Dwarf Mountain Pine

(*Pinus Mugho Compacta*)

True Dwarf Form

Hill's Dwarf Mountain Pine is a strain of *Pinus Mugho*, which we have developed through years of type selection, being a genuine true dwarf grower, many stemmed, compact, with good dark green color, which it retains throughout the winter.

Many inferior forms of this variety offered as *Pinus Mugho* are on the market, some of which are loose, open growers and some of upright, irregular habit. The strain we offer is the true dwarf, compact type, and the seed is obtainable only at great expense, in small quantity, because of its scarcity. When obtainable, the true seed costs as high as \$15.00 per pound, in contrast to \$1.50 per pound for the common form.

The scope of its usefulness in landscaping is almost unlimited. It is excellent for foundation groups, or low borders. It never grows over four to five feet high, but spreads out six or eight feet when full grown. By annual shearing of the new growth it can be kept as small as desired.

Price, Extra Selected Specimens, Balled and Burlapped

Genuine, true type Hill's Dwarf Mountain Pine showing new season's growth.

White Pine (*Pinus Strobus*). Each tier of branches is one year's growth.

Scotch Pine

(*Pinus Sylvestris*)

A very rapid, upright grower, having long, stiff blue-green foliage. Satisfactory for sandy dry soil or exposed locations. Grows into a large tree.

The Scotch Pine has a greater geographical distribution than any other Pine. It is spread over the whole of Europe and part of Asia. We obtain our seed from Sweden, where the best form grows, exactly suited to American conditions. Makes well formed ornamental specimens.

White Pine

(*Pinus Strobus*)

King of the Forest

The White Pine is the largest of all conifers native to the eastern part of the United States. The crowns of mature White Pines in mixed forests conspicuously overtop the surrounding hardwoods.

It readily adapts itself to both dry and moist soils, for it is found on the poorest and driest sand, and on steep, rocky slopes, and also on moist clay flats and river bottoms. White Pine can endure considerable shade for a number of years, but as it becomes older it requires more and more light for its development.

It grows rapidly; each season's growth is plainly noticeable as shown in this picture. Has long flexible needles, whitish beneath. On account of its fast growth and subsequent immense size, it makes a wonderful tree for tall backgrounds, shelter from winds, and for tall screens.

Please note that Hill's White Pine are several times transplanted. This produces a better top growth as well as an abundance of roots. Even the ten-foot size will transplant readily.

Scotch Pine (*Pinus Sylvestris*). A fast grower with strong, heavy branches.

The part that Evergreens can play in home landscapes knows no limitations. Such a planting will make your every home-coming pleasant. The bright color of the new spring's growth will be a delight, while the various shades of greens and blues will give a cheerful welcome in the cold and snowy wintry days.

Japanese Yew (*Taxus cuspidata*). Very hardy—dark green foliage, scarlet fruits, and keeps its color throughout the winter. This is an old specimen of the low, bushy type. For smaller trees as they grow in the nursery see page 42.

The Yews

(*Taxus*)

In the old world the Yew tree is a tradition, being of geological antiquity. Its history is interwoven with the growth of civilization. The Fortingal Yew in England, 56 feet in circumference, proved by the rings of its stump that it had lived almost 3000 years. Many interesting books have been written on the history of this one genus of trees. Not all varieties of Yew will stand the rigour of our climate, but the three selected types described on this page are among the best for American gardens.

American Yew

(*Taxus Canadensis*)

A valuable dwarf Evergreen, seldom ever growing more than two or three feet above the ground. Has densely clothed dark green foliage. Particularly beautiful in autumn when loaded with scarlet colored fruits. Thrives well in shade. Can be trimmed to any desired shape. Very hardy. Sometimes called Canadian Yew. The foliage assumes a reddish tint in winter; very striking.

	Price, Extra Selected Specimens, Balled and Burlapped	Each	10
1 to 1½ feet xxx.....	B&B	\$4.50	\$40.00

Japanese Yew

(*Taxus Cuspidata*)

A distinctly valuable Yew, growing 40 to 50 feet high. Under cultivation, somewhat smaller. Has been cultivated throughout Japan from time immemorial, and introduced into America many years ago, having taken its place as one of the most noteworthy and valuable on the entire list. It originated in the cold high altitudes of Northern Japan, from where we obtain our seed, and is found fully able to successfully withstand extremes of heat and cold in America. Grows close, upright and compact. Foliage dark green, fruit bright scarlet. The Arnold Arboretum reports: "This Yew is the most valuable plant which Japan has furnished our Northern States. Reported perfectly hardy in Minneapolis."

	Price, Extra Selected Specimens, Balled and Burlapped	Each	10
1 to 1½ feet xxx.....	B&B	\$4.75	\$45.00
1½ to 2 feet xxxx.....	B&B	6.25	60.00

Dwarf Japanese Yew

(*Taxus Cuspidata Brevifolia*)

Similar to *Taxus Cuspidata* but is very dwarfish and compact growing. The foliage consists of little bunches of black green foliage. Of irregular and picturesque outline, ultimately becoming 5 to 6 feet high and 5 or more feet wide. Absolutely hardy. It retains its rich dark green color, entirely throughout the winter, which added to its other points of superiority, makes it one of the most valuable Yews. On a visit of Professor Sargent, Director of the Arnold Arboretum, at Jamaica Plains, Massachusetts, to our nurseries in 1915, he was greatly impressed with the fine appearance of our stock of this valuable variety, and mentioned especially about its absolute hardiness and adaptability to all American conditions, also the probability of its great popularity.

American Yew (*Taxus Canadensis*). Don't forget the Yew for a shady corner—it will do well there.

Japanese Yew (*Taxus cuspidata*). This tree photographed in our nursery is 3 to 4 feet high. It shows the habit of smaller trees. On page 40 is a picture of an old specimen.

This specimen of American Arbor Vitae is 4 to 5 feet high, diameter about 3 feet. We have hundreds of such trees.

A little colony of American Arbor Vitae nestled among the Pines and Spruces.

American Arbor Vitae

(*Thuya Occidentalis*)
“White Cedar”

Trees of this genus are of ancient origin, representatives of *Thuya Occidentalis*, having existed throughout the northern hemisphere, in early periods of the earth's history. Its introduction into American Gardens took place at the beginning of landscape development in America. It was probably the first American coniferous tree cultivated in Great Britain; being introduced prior to 1597 in which year it was mentioned by Gerrard in his “Historie of Plants.”

The American Arbor Vitae is the mother tree, from which upwards of fifty distinct types have been developed, varying in color from deep green to bright golden and ranging in size from little dwarfs to tall pyramidal specimens. The native forests of Arbor Vitae have long been of great commercial value for timber, producing tall, straight trunks much used for telegraph poles.

Growing over such a wide range in its native growths, trees from some sections are open growing and undesirable, but we are careful to obtain our seed from certain sections of Northern Wisconsin, producing stock of absolute hardiness, good green color and compact habit of growth. The Arbor Vitae is very hardy and dependable in almost any situation. A moist location is preferred. Stands trimming well, and for this reason is widely used for hedge purposes. Complete information regarding hedges will be found on pages 58 and 59. The rate of growth and ultimate height depends largely upon conditions. It usually grows bushy at the bottom and tapering toward the top. Foliage is very soft and flexible and of fine deep green color.

Peabody's Golden Arbor Vitae

(*Thuya Occidentalis Lutea*)

Improved Selected Strain

A distinct golden type, which we have been able to improve considerably by closer selection, propagating only the brightest golden color, producing plants of exceptional merit. Rather slender in habit, reaching 12 to 15 feet high with a diameter of 2 to 2½ feet. Such an abundance of golden color is seldom borne upon a single tree. Like all Arbor Vitae it can be trimmed and maintained at any size wanted. Should be used sparingly for best effects and in combination with other trees.

Price, Extra Selected Specimens, Balled and Burlapped

Siberian Arbor Vitae (*Thuya Wareana Siberica*).

An unusual but fascinating specimen—*Juniperus fitzgeraldiana* punctuated with *Thuya arbor vitae* (*Thuya pyramidalis*).

Hill's Pyramidal Arbor Vitae (*Thuya Pyramidalis*). Extremely narrow habit, retaining its dark green color all winter.

Hill's Pyramidal Arbor Vitae

(*Thuya Occidentalis Pyramidalis*)

Narrow, Compact Habit

The growth of Hill's Pyramidal Arbor Vitae is close, compact and regular—extremely narrow and pyramidal. Specimens twenty feet high seldom measure over two feet in diameter at the base. On this account it is ideal for formal uses. The beautiful dark green color is retained all winter, a feature of great importance where fresh green winter effects are needed. It requires but little space and is therefore well suited for planting near the house in foundation plantings or to give accent to the entrance. It also makes an ideal Evergreen for winter window boxes and tubbing.

It has been used as far north as Minneapolis and has met with hearty approval. It stands the winters without losing its attractive green color. It has also given wonderful satisfaction in the Eastern and even Pacific Coast States.

We have been developing Evergreens for many years and have observed many types of Pyramidal Arbor Vitae under all conditions of soil and climate. We offer this improved strain with full assurance that it marks a decided improvement well worthy of your attention.

Price, Extra Selected Specimens, Balled and Burlapped

		Each	10
2 to 3 feet xxx.....	B&B	\$3.50	\$32.50

5 of the same variety and size at 10 rate. Each x indicates one transplanting.

Low growing Evergreens have been extended along each side of a curved entrance path. A departure from the usual style of entrance planting, but certainly a harmonious arrangement.

Woodward's Globe Arbor Vitae

(*Thuya Woodwardi*)

Without doubt one of the best globe forms on the list. Originated and introduced by Mr. Jacob Manning, Proprietor of the Reading Nurseries, Reading, Mass., and named after his son J. Woodward Manning. A few plants presented by the introducer shortly before his death to D. Hill forms the basis of our stock. Therefore, we can justly say that our stock is the true strain.

Fine for low borders or in foundation groups as shown on page 53. Also especially suitable for tubs and urns. It maintains the natural globe shape without trimming and will reach three feet in height and diameter.

Extra Selected Specimens, Balled and Burlapped

	Each	10
2 by 2 feet xxx.....	B&B \$5.00	\$47.50

Woodward's Globe Arbor Vitae, one of the best natural globe varieties.

Douglas Golden Arbor Vitae

(*Thuya Douglassi Aurea*)

A really valuable Golden form originated by Robert H. Douglas. A good golden color, not so bright as Peabody's, but a superior grower, forming a broad, bushy heavy specimen. Its unusual bright golden color adds contrast and a novel touch when planted with other Evergreens. Can be easily sheared and kept at any height or form desired.

Like all bright colored Evergreens this tree should be used, especially with a background of good dark green varieties.

Price, Extra Selected Specimens, Balled and Burlapped

	Each	10
2 to 3 feet xxx.....	B&B \$4.25	\$40.00

Douglas Pyramidal Arbor Vitae

(*Thuya Douglassi Pyramidalis*)

Its foliage is feathery, somewhat crested and of a good dark green color. Its habit is pyramidal, resembling the well known Pyramidal Arbor Vitae. It grows 12 to 15 feet in height. It can be used to good advantage for sentinels or for any formal effects.

Price, Extra Selected Specimens, Balled and Burlapped

B&B signifies balled and burlapped.

Among the best dwarf Evergreensens is Hill's Dwarf Mountain Pine. This picture shows a section of a field of about 3000 trees.

The low border in this planting can be duplicated with Globe Arbor Vitae on page 45 or Woodward's Globe Arbor Vitae on page 50. Taller trees in back are Red Cedar, Juniper Counarti, Juniper Glaucia. The whole group would be sufficient for a space 30x10 feet. cost only \$60.00 to \$75.00.

Select Your Evergreens From This Page

For the convenience of those not so familiar with Evergreens in their different habits, we have divided the important varieties into groups: Very Dwarf, Dwarf, Medium and Tall.

TRAILING, CREEPING, OR VERY DWARF

Fine for Rockeries, Borders, Edging or Ground Covers. All Prostrate or Creeping Forms, 1 to 2 feet high at maturity, spread 8 to 15 feet in diameter.

	Page		Page
<i>Juniperus Canadensis</i>	18	<i>Juniperus Tamariscifolia</i>	23
<i>Juniperus Canadensis Aurea</i>	18	<i>Juniperus Sabina Horizontalis</i>	19
<i>Juniperus Procumbens</i>	19	<i>Juniperus Virginiana Globosa</i>	23
<i>Juniperus Sabina Prostrata</i>	20		

DWARF OR LOW GROWING VARIETIES

Excellent for Foundation Plantings, Low Groups, Terraces, and Conifer Beds. Splendid where permanent effects are wanted without obstructing the view. Average height, 4 to 6 feet at maturity.

	Page		Page
<i>Juniperus Pfitzeriana</i>	21	<i>Thuya Occidentalis (Globes)</i>	45
<i>Juniperus Sabina</i>	25	<i>Thuya Douglassi Aurea</i>	50
<i>Pinus Mugho Compacta</i>	37	<i>Thuya Lutea</i>	46
<i>Pinus Tanyosha</i>	38	<i>Thuya Wareana Siberica</i>	46
<i>Taxus Canadensis</i>	41	<i>Thuya Woodwardi</i>	50
<i>Taxus Cupidata Brevifolia</i>	41		

MEDIUM HEIGHT VARIETIES

Excellent for borders to add contrast to flowering shrubs. Fine for corners to give accent and add height to plantings of creeping or low growing Evergreens. Good for sentinels or markers at each side of entrance steps, windows, or in garden. Average height, 8 to 15 feet at maturity.

	Page		Page
<i>Abies Balsamea</i>	7	<i>Juniperus Scopulorum</i>	11
<i>Abies Tsuga Canadensis</i>	9	<i>Pinus Cembra</i>	34
<i>Juniperus Counarti</i>	16	<i>Pinus Flexilis</i>	34
<i>Juniperus Elegants Lee</i>	16	<i>Taxus Cupidata</i>	41
<i>Juniperus Glauca</i>	15	<i>Thuya Occidentalis</i>	45
<i>Juniperus Virginiana Pyramidalis</i>	15	<i>Thuya Douglassi Pyramidalis</i>	50
<i>Juniperus Schotti</i>	15	<i>Thuya Pyramidalis</i>	49

TALL GROWING VARIETIES

For planting in Masses, Heavy Screens, Windbreaks, or High Hedges; Small Groups to frame a vista; Single Specimens where an imposing specimen is wanted to carry out some special effect. Average height, 30 to 60 feet at maturity.

	Page		Page
<i>Abies Concolor</i>	7	<i>Picea Pungens</i>	29
<i>Abies Douglassi</i>	7	<i>Pinus Austriaca</i>	33
<i>Juniperus Virginiana</i>	13	<i>Pinus Ponderosa</i>	34
<i>Picea Alba</i>	27	<i>Pinus Resinosa</i>	33
<i>Picea Canadensis</i>	30	<i>Pinus Strobus</i>	38
<i>Picea Excelsa</i>	30	<i>Pinus Sylvestris</i>	38
<i>Picea Pungens Kosteriana</i>	29		

The owner of the bed of Evergreens shown here used to spend half the price of the Evergreens each year in bedding plants and perennials—now he avoids replacing and expensive upkeep and enjoys the year around beauty of Everygreens

These grotesque and novel shapes (styled Topiary work) in Evergreens were trained in the Italian Garden on the Hunnewell Estate, Wellesley, Massachusetts.

EVERGREEN WINDBREAKS

The comforting influence of an Evergreen windbreak can scarcely be realized unless you have stepped behind a row of sturdy Evergreens on a blustering winter's day. In farming sections especially in the prairie states, the Evergreen windbreak has long been recognized as an important factor in protecting the home, stock and buildings. We have a special catalog with many suggestions and illustrations in regard to Evergreen windbreaks. Should you be unable to reach a decision in regard to your windbreak needs from information contained here, we will gladly send you a copy of our special windbreak catalog on request.

If you are interested in farm property you will find an Evergreen windbreak a wonderful investment. We have in our files letters from farm owners all over the country testifying they have received one to five thousand dollars more for their farms when planted with the Hill Evergreen Windbreaks.

Any farm or home exposed to winds will find Evergreen windbreaks a remarkable source of comfort.

How to Build Evergreen Windbreaks

There are three best ways to build an Evergreen Windbreak. The same results are accomplished with each method; the only difference is in the time it takes. You will not be disappointed in any of these planting arrangements. Just look over the plans submitted and choose the plan best suited to your needs.

PLAN NO. 1

Plant 10 feet apart

Results in Only Six Years' Time

A popular and economical plan is to space the trees 10 feet apart in a single row, which gives a windbreak in six years' time. This spacing gives the correct amount of room for the trees to develop. At the end of six years the branches will touch, and no thinning will ever be required. On this basis figure 100 trees to each 1000 feet.

PLAN NO. 2

Plant 5 feet apart

Results in Only Four Years' Time

If you desire quicker results, space the trees 5 feet apart in a single row. At the end of five years take out every other tree and plant elsewhere. After this no further thinning will be required. On this basis 100 trees will plant 500 feet.

PLAN NO. 3

Plant 2½ feet apart

Results in Two Years' Time

Where almost immediate results are wanted, space the trees in a single row, 2½ feet apart. This gives a Windbreak in the shortest possible space of time. At the end of three years take out every other tree, leaving trees 5 feet apart. After four years more, thin trees to 10 feet apart. After this no further thinning will be required. On this basis figure 100 trees to each 250 feet.

Evergreens give protection in winter, the time when most needed.

The Farm Home before it was given the protection of a Hill's Evergreen Windbreak—The whim of the Blizzard Winds—Bleak—"Cold as an abandoned barn."

PRICES

Windbreak Evergreens

Price: Twice Transplanted—Twice Root-Pruned Stock

	25	50	75	100
Medium Size, 10 to 12 inch.....	\$ 8.25	\$16.00	\$23.25	\$30.00
Large Size, 1 to 1½ feet.....	9.50	18.50	26.00	35.00

Super Size, 2 to 3 feet.....	17.00	33.50	49.50	65.00

Varieties

Norway Spruce is the variety generally used, although any of the following varieties make excellent windbreaks.

Red Cedar
Scotch Pine
White Pine

NOTE: These trees are not dug with earth ball or burlapped, but are packed in damp moss, so they reach you in excellent planting condition. Do not confuse these trees with specimens (balled and burlapped) Evergreens.

The same Farm Home after given the blanket-like protection of a Hill's Evergreen Windbreak—Warm—Free from sweep of wind—worth hundreds of dollars more to owner—or buyer.

Evergreen Hedges serve a practical as well as ornamental value. They make a barrier equal to a tight wire fence.

Hill's Evergreen Hedges Attractive, Durable, Inexpensive

The wide variety of uses an Evergreen hedge will serve on your grounds is almost without end. The various shapes and sizes into which an Evergreen hedge may be trimmed makes it possible to grow a hedge in almost any situation. It will be found that an Evergreen hedge is just as effective in keeping out intruders as a fence. The branches soon form an almost impenetrable barrier.

Varieties To Use

Evergreens with soft, flexible foliage make the best hedges. The American Arbor Vitæ, Hemlock and Red Cedar are the most satisfactory varieties. Arbor Vitæ hedges are shown on this page and on page 59, Hemlock hedge on page 9. The picture on page 55 shows how easily the Red Cedar can be trimmed into any shape or size wanted.

Planting and Cultural Care

Smaller sized trees one to three feet such as those offered below ought to be planted about one foot apart. Such an arrangement provides plenty of room for development and still gives the hedge a compact appearance right from the start. In trimming the hedge, the item of first importance is to see that the bottom part has access to air and sunlight. In other words trim in an oval shape or in some manner so that the bottom of the hedge is wider and tapers toward the top.

Prices

		25	50	75	100
Red Cedar	xx 10 -12 inch.....	\$ 8.25	\$16.00	\$23.25	\$30.00

Hemlock	xx 1½- 2 feet.....	17.00	33.50	49.50	65.00

Each x indicates one transplanting.

The great value of American Arbor Vitae lies in the dense impenetrable growth, its excellent green color and ready response to shearing. Such a hedge can be grown in only a few seasons with
American Arbor Vitae.

SMALL EVERGREENS FOR TRANSPLANTING

This is the second stage in the growth of Hill's Evergreens. When two years old the trees are planted in oeds in rows where they remain two years. Trees in this picture are four years old. See trees listed as once transplanted on opposite page

This field shows the third stage of development of Hill's Evergreens. Such trees are twice transplanted, six years old. See opposite page for list of varieties and prices on twice transplanted Evergreens.

SMALL EVERGREENS FOR TRANSPLANTING

Customers having extensive grounds to develop will be interested in these small trees to plant out, into rows and grown on. These sizes are not recommended for immediate use. Cultural directions with each shipment.

"There are delights," says a writer of ancient times, "that will fetch the world around from sun to sun, and rock the tedious year as in a delightful dream." One best of these delights is found in a garden.

One of the many uses of Hill's Hardy Evergreens.

Hill's Evergreens for Window Boxes

See to it, during the winter months, that your window-boxes, urns, etc., are filled with hardy Evergreens, just as you see to it that Geraniums and Vincas are there for Decoration Day. A window-box planted with growing Evergreens of different varieties and colors will add much to the appearance of the porch, windows or any room in the house. For winter decoration, Hill's Hardy Evergreens are indispensable. The charming foliage effects and rare fragrance of Evergreens are remarkable, adding color, warmth and cheerfulness, while their rugged hardiness permits outdoor or indoor use all the year around.

NOTE: In estimating number of trees required figure about one tree per foot of window box—thus a three foot box would require four plants, etc. If your boxes are fairly wide, eight inches or more, you can use two rows of trees. Plant in good black dirt and keep watered well.

Hill's Ornamental Flowering Shrubs

The beauty of shrubs lies in their beautiful flowers, highly colored berries and bark and twigs of various hues. It is our aim to produce only the useful and hardy types, worthy of general cultivation in our climate.

Japanese Barberry

(*Berberis Thunbergii*)

Small foliage, bright green in color, turning to orange and red in autumn. Scarlet berries hang on the branches all winter. Valuable for low hedges. May be pruned to any form or height. Grows 4 to 6 feet high.

Price	10	100
10 to 12 inches.....	\$4.00	\$30.00
1 to 1½ feet.....	5.00	40.00

Golden Twigged Dogwood

(*Cornus Stolonifera Aurea*)

Especially pretty in winter with its golden yellow branches. A vigorous grower.

Price	10	100
2 to 3 feet.....	\$5.00	\$40.00

Siberian Red Osier

(*Cornus Siberica*)

An upright shrub, with bright, blood red branches. Leaves dark green, pale underneath. Flowers creamy white in flat top clusters. Fruit light blue or bluish white.

Price	10	100
2 to 3 feet.....	\$5.00	\$40.00

Fortunes Golden Bell

(*Forsythia Fortunei*)

Dark green leaves. Bright yellow flowers come out very early in spring before the leaves.

Price	10	100
2 to 3 feet.....	\$5.00	\$40.00

Amoor River Privet-North

(*Ligustrum Amurense*)

Hardy. Leaves small and nearly evergreen. Valuable for hedges. Grows 8 to 12 feet tall.

Price	10	100
2 to 3 feet.....	\$4.00	\$35.00

Japanese Bush Honeysuckle

(*Lonicera Morrowi*)

Leaves dark green. White flowers bloom in May, followed by red fruit in August. Grows 8 to 12 feet tall.

Price	10	100
2 to 3 feet.....	\$5.00	\$40.00

Tatarian Honeysuckle

(*Lonicera Tatarica*)

Small, bright red flowers are followed by tiny attractive red or orange berries.

Price	10	100
2 to 3 feet.....	\$5.00	\$40.00

Sweet Scented Mock Orange

(*Philadelphus Coronarius*)

White flowers in May. Grows 10 feet tall.

Price	10	100
2 to 3 feet.....	\$5.00	\$40.00

Large Flowering Mock Orange

(*Philadelphus Coronarius Grandiflora*)

Large white flowers, May and June. Grows 8 to 12 feet tall.

Price	10	100
2 to 3 feet.....	\$5.00	\$40.00

Spirea Van Houttei (Bridal Wreath)

Golden Elder

(*Sambucus Canadensis Aurea*)

Foliage a golden yellow all summer. Flowers white, followed by purplish red berries. Grows 6 to 8 feet tall.

Price	10	100
3 to 4 feet.....	\$6.00	\$50.00

Cut Leaved Elder

(*Sambucus Nigra Laciniata*)

Finely cut leaves. Abundant white clusters of flowers in June and July, followed by berries.

Price	10	100
2 to 3 feet.....	\$5.00	\$40.00

Golden Ninebark Spirea

(*Spirea Opulifolia Aurea*)

Golden yellow flowers. Double white flowers bloom in June. Very effective in shrubbery plantings. Grows 8 to 12 feet tall.

Price	10	100
2 to 3 feet.....	\$5.00	\$40.00

Bridal Wreath

(*Spirea Van Houttei*)

Of graceful habit. Snow white flowers in panicles appear in May and June. Grows 5 to 6 feet tall.

Price	10	100
1½ to 2 feet.....	\$3.50	\$30.00
2 to 3 feet.....	5.00	40.00

Purple Persian Lilac

(*Syringa Persica*)

The old fashioned Lilac; lavender flowers, bloom in May. Grows 8 to 12 feet.

Price	10	100
1½ to 2 feet.....	\$5.00	\$40.00

White Persian Lilac

(*Syringa Persica Alba*)

Best of white lilacs. Very fragrant. Heavy flowers.

Price	10	100
2 to 3 feet.....	\$6.00	\$50.00

Philadelphus Grandiflora

Snowberry

(*Symporicarpos Racemosus*)

Small pink flowers in July, followed by large white berries in the late summer and fall. Grows 4 to 5 feet high.

Price	10	100
2 to 3 feet.....	\$5.00	\$40.00

Coral Berry

(*Symporicarpos Rubra*)

Produces a wealth of red or purplish berries, remaining on the branches all winter. Flowers greenish red in summer. Very showy in early winter.

Price	10	100
2 to 3 feet.....	\$5.00	\$40.00

Pink Weigelia

(*Weigelia Rosea*)

A gem from China. Rose colored flowers in May and June.

Price	10	100
2 to 3 feet.....	\$6.00	\$50.00

Philadelphus, Barberry, Lilac

Evergreen Vines and Ground Cover

Some of the principal uses of ground cover are as follows: In rockeries, bordering walks and drives, bordering shrubs and flower beds, under Evergreen and shrub plantings, in semi-shade or dense shade, or steep terraces, in cemetery plots, for winter window boxes, among stepping stones and many more. We offer only hardy tested sorts listed below.

Japanese Spurge

(*Pachysandra Terminalis*)

A splendid Evergreen ground cover with thick, glossy, green foliage, forming a dense mat, making low-growing cover plant. Excellent for edging, underplanting, etc. Does well in dense shade where grass will not grow. Keeps its leaves all winter and is very hardy. Grows 6 to 9 inches tall and spreads along the ground.

Price Strong Plants	25	50	100
4 to 6 inch (transplanted).....	\$3.50	\$6.50	\$12.00
6 to 8 inch (transplanted).....	4.50	8.00	15.00

Evonymus Radicans Vegetus

This is an Evergreen vine that has no rival among all vines, either Evergreen or Deciduous. In late fall and winter it produces an abundance of showy red fruit and yellow pods. By means of aerial rootlets it clings closely to brick or stone walls; soon makes a good covering. The growth is rapid.

Price Strong Plants	10	25	50	100
8-10 inch (transplanted).....	\$2.00	\$4.50	\$8.00	\$15.00

Evonymus Radicans Acutus

Distinguished on account of its sharp-pointed leaves. A very attractive hardy Evergreen vine; our stock is extra choice.

Price Strong Plants	10	25	50	100
12 to 15 inch (transplanted).....	\$2.50	\$5.50	\$10.50	\$20.00

Japanese Spurge (*Pachysandra Terminalis*). Stays green all winter and is perfectly hardy. The plant in corner is Japanese Barberry.

The Home of Hill's Evergreens

Here is shown our complete nursery establishment, consisting of nurseries, office, packing sheds, stables, box-making plant, storage, boarding house, greenhouses, and tree seed cleaning establishment.

All modernly equipped and maintained for the handling of your orders in the most prompt and efficient manner. The fields of growing stock contain the most complete line of Choice Specimen Evergreens in America. Our over sixty years' experience in the digging, packing and shipping of Evergreens is your guarantee of complete satisfaction and a square deal.

THE D. HILL NURSERY CO., Inc.

EVERGREEN SPECIALISTS—LARGEST GROWERS IN AMERICA

DUNDEE, ILLINOIS

A Word of Appreciation

We wish here to express sincere thanks to our many friends and patrons who have written kind words relative to the quality of stock and treatment they have received from us the past season. We greatly appreciate these expressions of confidence and shall endeavor to maintain the reputation they have so kindly given us.

Hill Quality

The name of D. Hill has come to be synonymous with "High Quality" in Evergreens. Over half a century of conscientious effort, unbounded enthusiasm, a close study of the value of every new specie introduced; and above all, an ambition to make new friends and keep the old, has been the method by which this high position has been reached.

Your Success With Our Stock

is a matter in which we are mightily interested. Therefore, we endeavor to do everything reasonable within our power to help you succeed with the stock we send you, because we love trees and want you to enjoy them also. No firm is more careful in filling orders; we use every reasonable means to learn the customer's wishes without delaying the shipment. Your interests are our interests and we present you this 1923 catalog, confident that we merit your trade, and assure you of the best treatment, whether the order is large or small.

Special Offer No. 100 Hill's Dwarf Mountain Pine

(*Pinus Mugho Compacta*)

1 to 1½ feet
Balled and Burlapped

\$3.00 Each

Truly a sensational triumph in Evergreen growing. It excites the wonder and admiration of all. The Hill strain, which we have developed through years of type selection, is a low, close, compact grower, having many stems and is of excellent green color. The branches in the spring tipped with the new growth, closely resemble tiny candlesticks over the entire tree.

It should be in every lawn or garden of every lover of beautiful Evergreens. Described by an eminent horticulturist as a "marvel of rich beauty." It grows to perfection in all parts of the country and is absolutely hardy.

Thousands took advantage of this wonderful offer last season and many expressed great surprise at the magnificence of the tree. The illustration shows the tree dug with ball of earth and burlapped ready to box and ship to you.

As our friends become acquainted with it they join us in admiration of its exquisite form and delicate beauty.

Hill's Dwarf Mountain Pine
(*Pinus Mugho Compacta*)

Business Terms

PRICES. Prices in this catalog are F. O. B. Dundee, Illinois. There are no charges for packing or delivery to the railroad station. This catalog cancels all previous catalogs and price lists. Prices are subject to change without notice.

TERMS. Cash should accompany orders from all unknown customers. Charge account service will be extended to those who furnish satisfactory references.

RATES. Five trees of same variety and size will be furnished at 10 rate, 50 of same variety and size at 100 rate.

OUR RESPONSIBILITY. We exercise the greatest care to have all stock genuine and reliable and hold ourselves prepared to replace on proper proof all that proves untrue. In case of any error on our part, it is mutually agreed between the purchaser and ourselves, that we shall not at any time be held responsible for a greater amount than the original price of goods.

GUARANTEE. We guarantee that all Evergreens purchased from us will reach you safely and in good condition, be found true to name and prove entirely satisfactory or we cheerfully refund money paid.

ADJUSTMENTS. Any errors or omissions in execution of orders will be satisfactorily adjusted if we are notified immediately upon receipt of goods.

OUR SHIPPING FACILITIES. On account of our close proximity to Chicago (the great railway center), we have direct access to all the leading railroads. In most cases specimen Evergreens dug with solid earth balls are shipped by freight.

Your Correspondence is Invited

How to Reach Our Nursery

Visitors are always welcome. We are conveniently located only 42 miles northwest of Chicago.

When coming by the way of Chicago, you are directed to the C. & N. W. Depot on Madison Street, from where it is an interesting ride of one hour and thirty minutes direct to Dundee.

For an hourly service from Chicago, take the A., E. & C. Electric Line at Wells Street and Jackson Boulevard, direct to Elgin, transferring to the Dundee-Carpentersville car, getting off at Stop No. 4, from where it is but a two-minute walk direct to our office, which is located right on the nursery grounds.

Paved Road from Chicago brings you Direct to Our Nursery.
